TRIAD

A complete selection of raised floor, custom containment, airflow, and patented in-floor monitoring solutions.

Custom containment & airflow solutions at an effective price point for each facility.

Raised Floors & Containment

SEAHAWK

Leak detection systems pinpoint small fluid leaks before they become major disasters.

Over 16 million feet of patented leak detection cable in service globally.

Leak Detection

FALCON

Wired and wireless systems monitor facilities for changes in temperature, humidity, & more.

Facilities worldwide trust our WiNG wireless platform to monitor their environments.

Facility Monitoring

RAPTOR

Leverage protocol communications to integrate equipment into BMS and other automation systems.

Raptor products also simplify protocol translation and alarm annunciation.

System Integration

RLE SERVICES | BOOKING NOW Certified Technicians travel to your site to install, startup, and commission our leak detection and monitoring products. Our Services Staff has extensive familiarity with RLE products and will complete your job quickly and reliably.

With more than 35 years in the industry, RLE engineers and manufactures reliable, quality products and services that prevent disasters, preserve our clients' reputations, and provide peace of mind.

RLE products are proudly made in the USA.

Raised Floors & Custom Containment, Leak Detection, Facilities Monitoring, & Network Integration Solutions

TRIAD

Our airflow specialists have designed solutions for data centers around the globe. From raised floor panels and intelligent air movers, to custom containment and blanking products, our complete product portfolio allows us to work with you and the specific parameters of your facility to create a solution that addresses all your airflow needs.

SEAHAWK

Engineered to provide unparalleled protection against any form of conductive fluid that might threaten your facility. The line includes fluid sensing cable and spot detectors as well as the monitoring devices and accessories to support them.

FALCON

Facilities Monitoring Systems provide facility managers with complete peace of mind against environmental threats such as temperature, humidity, fluid leaks, pressure, airflow, smoke, and much more.

RAPTOR

Integration Solutions ensure that all your systems work together seamlessly. If you would like to integrate equipment and sensors into current building automation and monitoring systems, Raptor products will simplify protocol translation and alarm annunciation.
